China India Scholar-Leaders Initiative Closing Virtual Event

March 18-19, 2021 New York City

First Cohort Fellows (2017-2019)

Second Cohort Fellows (2018-2020)

Final CISLI Seminar Agenda China India Scholar-Leaders Initiative

March 18-19, 2021 in NYC (March 19-20, 2021 in Asia)

ZOOM LINK: https://NewSchool.zoom.us/j/96468539971?pwd=NHpoK2VucE0xV3hpbUEvdEdrbTF4Zz09

DAY 1: 8:30 pm - 12:00 (EST), Thursday, March 18, 2021 in NYC (Friday, March 19 in Asia)

Session One: Welcome Remarks & Updates: 8:30 pm-9:30 pm (New York Time) (A Roundtable conversation with the CISLI Fellows, Mentors, ICI Team)

Session Two: 9:30 pm-10:45 pm: CISLI Research Reflections (up to 12 minutes each)

- 1) Aveivey Dahrii: Education and Gender Inequalities in Yunnan and Manipur: A Sociological Study
- 2) Ping (Sophie) Sun: The Technopolitics of Gender: A Comparative Study of Female Programmers between India and China
- **3) Wenjuan Zheng:** Transnational Collaboration Falling Short for Covid-19 Crisis: The Unintended Consequences of International NGO Law in China and India
- 4) Tshering Chonzom Bhutia: Tibet as Border Region and a "National Security Screen': Implications for India

Discussants (up to 3 minutes each)

- Qudsiya Contractor
- Liu Jian
- Vijayanka Nair
- Mahendra P. Lama

Q&A (10 minutes)

Session Three: 10:45 pm- 12:00 am - CISLI Research Reflections (up to 12 minutes each)

- 1) Anand P. Krishnan: Common and Different?: Analyzing the Amorphousness of State in its Interface with Labour in Leather Goods Manufacturing in Wenzhou and Mumbai
- 2) Wenrui Chen: Tight-knit Webs and Telescoping Families: Conversations with Psychological Experts in India & China
- 3) Yang Lu: China's NTS Strategy towards South Asia
- 4) Shuxi Yin: Economic Inequality and Growth in India: An Analysis at the State Level

Discussants (up to 3 minutes each)

- Xiaowen (Effie) Hu
- Joe Thomas Karackattu
- Marina Kaneti
- Xiaobo Zhang

Q&A (10 minutes)

DAY 2: 8:30 pm - 12:30 am (EST), Friday, March 19th (Saturday, March 20th in Asia)

Session Four: 8:30 pm-9:45 pm: CISLI Research Reflections (up to 12 minutes each)

- 1) Liu Peng: ODA with India' Characteristics: Imbalance between Donors and Recipients
- 2) Qudsiya Contractor: Tourism and Urban Transformation in Shanghai
- 3) Xiaowen (Effie) Hu: Accountable or Unaccountable? The Changing Role of Think Tanks in BCIM Cooperation
- **4) Chandra Sen:** Representation of Ethnic Minorities and Dalits in their Respective Higher Education: A Case Study of Beijing and Sichuan University and JNU as well as University of Allahabad

Discussants (up to 3 minutes each)

- Wenrui Chen
- Varaprasad S. Dolla
- Shuxi Yin
- Jonathan Bach

Q&A (10 minutes)

Session Five: 9:45 pm-10:45 pm: CISLI Research Reflections (up to 12 minutes each)

- 1) Vijayanka Nair: Face Value: The Social Life of Biometric Payment Systems in China
- 2) Joe Thomas Karackattu: Latent Opportunities for Agglomeration at the India-China Border Regions
- 3) Marina Kaneti: China's Vision for Multilateralism: A Relational Interpretation

Discussants (3 minutes each)

- Anand P. Krishnan
- Yang Lu
- Nimmi Kurian
- Yao Yang (tbc)

Q&A (10 minutes)

10:45 pm-12:30 am (midnight - EST) Beyond CISLI: Sustaining Friendships, Research, and Networks (A Roundtable conversation with the CISLI Fellows, Mentors, ICI Team)

Note: 8:30 pm EST/EDT in New York City would be: 6:00 am IST in India | 8:30 am CST in China | 8:30 am in Singapore | 7:30 am in Bangkok

Aveivey Dahrii

Title: Education and Gender Inequalities in Yunnan and Manipur: A Sociological Study

Abstract: China and India host the largest ethnic minorities and scheduled tribes in the world respectively. Ethnic minorities constitute about 110 million population in China and India constitutes about 105 million Scheduled Tribes. Thus, the study on these communities is crucial as they make up a sizeable proportion in both the countries. The words such as ethnic minorities, inequalities, indigenous, etc. are very sensitive and remain protected in both the countries. Likewise, the very word 'gender' is not a favourable concept for all genders. Therefore, in-depth study is required in this area as it is underresearched. At the same time, the topic may appear perennial for the social sciences and other related disciplines. However, no empirical study has been made in the case of Miao ethnic minorities in Yunnan and Poumai Naga tribes in Manipur where the study focuses.

Having said this, the purpose of the paper is to understand both the communities from the micro level study. It will explore from the sociological lens on how their identities are determined and categorised as ethnic minority and schedule tribe. Further, the study will also try to understand how their identities are held; perspective from self and others. This study attempts to understand the prevailing education and gender inequalities from the sociological lens. It also explores why there is gender-based inequalities in both the regions despite the high literacy rate and active women activists in the regions. The paper will also examine the indigenous notion of gender and the question of representation. The

research seeks to understand how far these communities have fared well in terms of education and gender. The paper will also examine the role of states and civil societies/NGOs to address the indigenous issues in terms of education and gender and the responses from the concerned communities.

Ping (Sophie) Sun

Title: The Technopolitics of Gender: A Comparative Study of Female Programmers between India and China

Abstract: By comparing the work practices of female technicians in China and India, the article explores the gender-technological politics in the information technology industry. Information technology has the dual attributes of social culture and labor politics. By comparing the IT work practices of women in China and India, the article attempts to show how gender issues are defined, reshaped and changed under the framework of globalization and urbanization. Due to the differentiated labor control and patriarchal mechanisms shown by China and India in the technical field, female programmers face completely different work practices, life fate and identity constructions. A cross-border technological production comparison helps us to reintegrate the gender-technology relationship into the tide of global development of information industry and digital society in the Global South.

Wenjuan Zheng

Title: Transnational Collaboration Falling Short for Covid-19 Crisis: The Unintended Consequences of International NGO Law in China and India

Abstract: Under conditions of extreme events such as the global health crisis followed by state failures, transnational collaboration that works across national boundaries seems to offer a natural and viable solution to the global challenges. Yet, "global civil society" fails to live up to their promise because they have been under attacks by the global rise of political conservatism. Using comparative case studies of a notable international NGO (INGO) working on women and labor issues across India and China, this paper provides preliminary results of what factors promote and hinder transnational collaboration in the age of pandemic. I argue that the enactment of INGO laws prior to the crisis have destroyed the foundations for effective collaboration. The comparative cases demonstrate that China ramped up a regulatory regime to curtail INGOs' activities via a rigid and comprehensive law reform in a short period of time. Whereas India as a democratic country adopts adaptive control that targets different organizations and implements the policy change in a gradual way. The approaches result in different dynamics of response to the crisis at the local level, but both are detrimental to the civil societies. This study makes a significant contribution to our understanding of transnational collaboration during extreme events in a comparative perspective.

Tshering Chonzom Bhutia

Title: Tibet as border region and a "national security screen": Implications for India

Abstract: It has been a decade since China's leader Xi Jinping visited the Tibet Autonomous Region. That visit in July 2011, though not his first, was undertaken on the occasion of the 60th anniversary of the signing of the 17 Points Agreement when he was the Vice President of China. In his speech in Lhasa, Xi

remarked: 'For our country, Tibet serves as an important national security screen.' High sounding at one level, it is not immediately clear what he meant by it. This paper is based on content analysis of leadership statements and government policy documents, as well as discussions, declarations, and so on at various government led meetings/forums etc. at the national level as well as regional level.

Discussants (up to 3 minutes each)

Session Three: 10:45 pm-12:00 am (New York Time/EDT)

CISLI Research Reflections (12 minutes each)

Anand P. Krishnan

Title: Common and Different?: Analyzing the Amorphousness of State in its Interface with Labour in Leather Goods Manufacturing in Wenzhou and Mumbai

Abstract: The economic and industrial reforms, and transformation of production wherein capital gains primacy over labour has changed the nature of state and labour in China and India. While leading to labour dualism and the rise of informal sector and work arrangements, this has also altered the role of the state in its interface with labour – from being a direct actor, this ranges to varying degrees: from being just a facilitator, non-interference, or simply being an absentee. State capacity – or incapacity – is a useful peg to understand the relationship of the state with labour, and to look at the former's responsiveness to the latter. While the overarching framework and logic to state's withdrawal or off-shouldering in both countries is common, there exist divergences that condition and constrain state's responsiveness differently. Based on comparative research on leather goods workers in Wenzhou and Mumbai, I attempt to look at the state's amorphousness, and how social and cultural factors shape or determine it. In the process, I analyze why state capacity plays out differently in both countries, and their degrees of successes or failures.

Wenrui Chen

Title: Tight-knit Webs and Telescoping Families: Conversations with psychological experts in India & China

Abstract: The rapid and uneven economic growth enjoyed by middle-and upper-class families in India and China has also brought with it substantial anxiety and guilt. Families that have attained certain social and financial status, must now wrestle with how to best facilitate their children's success and family's future class reproduction. Although therapists in Delhi, India and Beijing, China report similar concerns and family dynamics among their middle-and upper-class clients, there are also striking differences, such as the greater participation of men in therapy in Delhi. These differences reflect the political, social and economic landscape of each country.

Yang Lu

Title: China's NTS Strategy towards South Asia

Abstract: The paper reviews China's relations with SAARC and the development of the NTS agenda in the context of China-SAARC cooperation. By using "co-governance" theory to explain the power configuration of South Asia, it argues that South Asia can be characterized as a situation of moderate competition between India and China in separate domains. Since India has a preemptive advantage in the normative and institutional set-up of regional organizations in South Asia and excludes China's further involvement in regional multilateral platforms, multilateralism may not be an effective means for China to address common NTS threats with South Asian countries. Instead, bilateralism could be more effective for China's NTS strategy towards South Asia.

Shuxi Yin

Title: Economic Inequality and Growth in India: An Analysis at the State Level

Abstract: In recent decades, economic inequality has risen dramatically in the US and to a lesser extent in West Europe. The situation in the developing world is less clear. Living standards have risen for the majority of the population along with massive gains for elites. Possible causes include free trade and capital movements, technological change, tax and welfare policy, and changes in social norms. As well as the purely economic dimensions, these changes have affected democratic processes, as well as the sense of social solidarity and trust. I strive to shed light on why certain states have excelled and others floundered since the initiation of India's robust growth in the 1980s. I analyze the factors that may have been responsible for these divergent growth trends by using a balanced random-effects panel data model spanning the observation period from the 1990s to 2010s. My results provide evidence to support the notion that human capital investment (proxied by literacy rates), Gini coefficients, and macroeconomic volatility (proxied by the coefficient of variation of each panel period's output growth) are leveraging statistically significant impacts on state specific period averaged growth rates. More specifically, it appears that literacy rates were positively related to my dependent variable period average growth rate, while volatility and Gini coefficients were negatively linked.

~DAY 2~

8:30 pm – 12:30 am (EST), Friday, March 19th (Saturday, March 20th in Asia)

Session Four: 8:30 pm-9:45 pm (New York Time/EDT)

CISLI Research Reflections (12 minutes each)

Liu Peng

Title: ODA with India' Characteristics: Imbalance between Donors and Recipients

Abstract: India's profile as a donor provider in the international community has drawn unprecedent attention in so called vaccine diplomacy. Media coverage and commentary has failed to revile the long history of India's way of providing assistance since its very beginning of establishment, its complex relations between donors and recipients, and its characteristics as one of the emerging donors different from traditional donors like OECD countries. The continuity and evolution of India's ODA policy (preferably to be called Development Partnership in Indian official policy documents) both reflect the logic of Indian's balance of domestic and international need, Indian's perception of inequality among nations, and the way forward to reduce the gap.

Qudsiya Contractor

Title: Tourism and urban transformation in Shanghai

Abstract: In this presentation, I will discuss how modes of city planning create a narrative about Shanghai's history and its way into the future. City planning in Shanghai over the decades has been geared towards transforming it not just as an international centre for trade but also a global tourist destination. Through insights from fieldwork conducted in Shanghai as part of the fellowship, I will discuss how Shanghai's contemporary urban history as presented through its key tourist destinations and urban transformation projects celebrates the city's journey into the future as a triumph of modernity that was made possible through societal transformation brought about from within. This has meant simplifying a complex history that converges over differences in regional affiliations and ethnicity.

Xiaowen (Effie) Hu

Title: Accountable or Unaccountable? The Changing Role of Think Tanks in BCIM Cooperation

Abstract: BCIM is a sub-regional cooperation which was initiated by think tanks of China and India in 1999. At the early stage, think tanks from China and India have made active efforts in promoting the mechanism and their proposals have received feedback from the government. BCIM was mentioned in the joint statement of China and India in 2013, which makes BCIM a typical case where think tanks can play a role. However, in the recent years this cooperation mechanism is becoming marginalized, especially in India. Since their access to policy making is limited, think tanks find it difficult to play a proper role

and their capacity has been restrained. Think tanks are playing a role of observers rather than an advisor or promoter which they used to be in BCIM cooperation.

The changing role of think tanks in this case reveals a common phenomenon that think tanks are not always an "advisor". The ideal nature of "independent" think tanks is also arguable. How think tanks work depends on various factors, and it makes us rethink the nature and function of think tanks, especially China and India think tanks, which are still in their infant stage.

Chandra Sen

Title: Representation of Ethnic Minorities and Dalits in their Respective Higher Education: A Case Study of Beijing and Sichuan University and JNU as well as University of Allahabad

Abstract: Education, particularly higher education in China and India, is an emerging issue of the twenty-first century globally. To understand China and India, or any country for that matter, its domestic politics, and social setting is very important. In this presentation, I would be discussing the concerns of marginalised communities in their respective societies. Historically, ethnic minorities and Dalits of China and India have been at the receiving end, respectively. The inclusion and the mobility of the historically marginalised communities could be seen in the context of their representation in higher education. The historical evolution of the education system in both China and India has some congruences and diversion that both the countries can learn and unlearn from each other. The two universities from each country have been taken as a site to understand the pedagogy, curricula and academic discourse of China and India. How did Chinese and India states have devised its education system for its nation building process would be discussed at a length to understand the issues of ethnic minorities and Dalits in both the societies.

CISLI Research Reflections (12 minutes each)

Vijayanka Nair

Title: Face Value: The Social Life of Biometric Payment Systems in China

Abstract: In 2017, Alipay introduced facial recognition-based payment systems to retail stores in China. "Smile to Pay" allows shoppers to make payments using facial recognition kiosks, obviating the need for cards, wallets, and indeed cellphones. Alipay is part of the world's largest financial technology company, the Ant Group. This article ethnographically tracks and analyzes how "newish" technologies are introduced to populations, and in turn, how intended audiences respond to these technologies shortly after they are launched. While people across China are familiar with biometric technologies, over the past few years consumer transactions have settled into the QR Code mobile payment mode. I examine how potential

users engage, become accustomed to, or steer clear of "Smile to Pay" kiosks. Based on fieldwork in Beijing, Hangzhou and Shanghai, this article follows facial payment systems being unveiled in fast food restaurants, malls, and bakeries. I pose two main questions. First, against the backdrop of Chinese state capitalism, how is trust manifested, reconstituted, or withheld at the moment of engagement with "Smile to Pay"? And second, (how) does biometric payment articulate with morally and aesthetically charged ideas relating to the face in China? In this context, I argue that it is fruitful to put social science scholarship on security, consumerism and value in the financial world in conversation with work on culturally specific ideas relating to the "face," embedded in such Chinese terms as *mianzi* (status) and *lian* (morality).

Joe Thomas Karackattu

Title: Latent opportunities for agglomeration at the India-China border regions

Abstract: The paper aggregates the quality of 'bordering' obtained in the India-China border regions – specifically the northeast of India and the South/ Southwest of China. While this transborder region has been the focus of existing informal regionalism initiatives such as BCIM, the actual gains have not been substantive owing to political challenges (including an outstanding border dispute and securitization of ties between India and China).

The paper draws on alternate parameters applicable to the region, borrowing on concepts drawn from network analysis, to offer insights into newer forms of collaboration that are/could be pursued over the short to medium term to allow for a reimagination of the transborder regions between India and China.

Marina Kaneti

Title: China's vision for multilateralism: a relational interpretation

Abstract: This paper interrogates China's multilateral engagement and global ambitions in the context of a multipolar world. It contends that assessment of multilateral interactions requires an understanding of how and why Chinese propositions for mutual cooperation and common future resonate with prospective multilateral partners. This does not simply mean an evaluation of soft power influence whereby the focus is on the ability of A to influence B without the force of coercion. Rather, my contention is that analysis of multilateral interactions hinges on an understanding of both the degrees of convergence and mutual construction of common aspirations; as well as an assessment of the extent to which China, in its role as a global leader, is willing to accommodate different propositions and points of view.

To develop these arguments, the paper draws on the case of a multi-partner exhibit staged in Beijing in 2019. To frame the links between the theoretical and empirical, as well as the broader inquiry around resonance in multilateral engagements, the paper draws on Qin Yaqing's relational theory. His discussions on the topic of difference and harmony provide insights into the value of multiple opinions in ensuring dynamic interactions. Far from suggesting that the exhibit addresses the vast range of issues associated with Beijing's global agenda and multilateral objectives, the paper contends that this multilateral event provides a compelling source for understanding the mechanics of collaboration. These pertain to the spaces for difference, the power of participation, and the evolving nature of multilateralism.

China India Scholar-Leaders Initiative

1st Cohort Fellows (2017-19)

Aveivey Dahrii

Assistant Professor (Guest Faculty), Department of East Asian Studies, University of Delhi Assistant Professor, Department of Sociology, Tetso College, Dimapur

Joe Thomas Karackattu

Assistant Professor, Humanities and Social Sciences Department, Indian Institute of Technology (IIT) Madras
Faculty In-Charge, IIT Madras China Studies Centre

Marina Kaneti

Assistant Professor and MPP Programme Co-Chair, Lee Kuan Yew School of Public Policy, National University of Singapore

Qudsiya Contractor

Independent scholar based in Goa. Previously Assistant Professor, TISS Mumbai and ISEC Bangalore

Shuxi Yin

Professor, Hefei University of Technology, China

Wenrui Chen

Human Behavior and Cultural Strategist, Beijing

Xiaowen (Effie) Hu

Associate Professor and Deputy Director, Institute of South Asian Studies, School of International Studies, Yunnan University

Yang Lu

Research Fellow, Institute of the Belt and Road Initiative Resident Scholar at Carnegie Tsinghua Center, Tsinghua University Associate Member, Institute of South Asia Institute, University of Heidelberg, Germany

China India Scholar-Leaders Initiative

The China India Scholar-Leaders Initiative (CISLI) was made possible by a generous grant from the Ford Foundation. This two-year fellowship helped foster the emerging field of India China Studies by supporting a new generation of scholars committed to producing new research, teaching, and course development around the common theme of Prosperity and Inequality in India and China.

2nd Cohort Fellows (2018-2020)

Anand P. Krishnan

Visiting Associate Fellow, Institute of Chinese Studies, Delhi

Chandra Sen

Academic Councillor (IGNOU), Jesus and Mary College, University of Delhi

Peng Liu

Associate Professor, Center for China's Neighbor Diplomacy Studies, Yunnan University

Ping (Sophie) Sun

Institute of Journalism and Communication, Chinese Academy of Social Sciences

Tshering Chonzom Bhutia

Advisor, Unit for International Cooperation (UIC), National Institute for Educational Planning and Administration (NIEPA)

Associate Editor, India Quarterly, Indian Council of World Affairs (ICWA)

Vijayanka Nair

Assistant Professor, Department of Anthropology, San Diego State University

Wenjuan Zheng

Postdoctoral Fellow, Stanford University

China India Scholar-Leaders Initiative CISLI Faculty Mentor Bios

China Faculty Mentors

Professor Yao Yang

Yao Yang is the Dean of the National School of Development and Director of the China Center for Economic Research. He has been following issues of land acquisition, ownership transformation, and migration in China for the past decade. He has taught economics at various institutions in China, Japan, and the US. He has also served as a consultant to the World Bank and participated in many contemporary debates about China's economic reform. Yao writes widely in the popular and academic press in China and is a respected authority on rural development.

Professor Liu Jian

Liu Jian special fields of expertise are Indian and South Asian Studies. His main publications include *India* (Yindu), (co-authored, 2003, 2010); *Indian Civilization* (Yindu Wenming), (co-authored; 2004, 2008); *Foreign Policies and International Relations of South Asian Countries* (Erzhanhou Nanya Guojia Duiwai Guanxi Yanjiu), (coauthored, 2007); and *Bangladesh* (Mengjialaguo), (2010). He has also published a number of research papers in Chinese and English in the fields of Indian and South Asian studies. He has also served as a main compiler and contributor to the *Encyclopedia of China-India Cultural Contacts* (2014).

Professor Xiaobo Zhang

Xiaobo Zhang is a senior Research Fellow at the International Food Policy Research Institute. Zhang earned B.S. in mathematics from Nankai University, China; M.S. in economics from Tianjin University of Economics and Finance, China; and M.S. and Ph.D. in applied economics and management from Cornell University in 2000. Zhang joined IFPRI in 1998. He has published widely in the fields of economic growth, income distribution, public investment and rural industrialization in China and other developing countries. He is a Co-editor of the Chinese Economic Review and was selected as president of Chinese Economists Society from 2005-06.

India Faculty Mentors

Professor Nimmi Kurian

Nimmi Kurian is an associate professor at the Centre for Policy Research in New Delhi, India. She is also the India Representative and Senior Advisor, India China Institute. Kurian's research interests are in border states and foreign policy; China's domestic politics; Indian and Chinese approaches to regionalism; and transborder governance. Some of the recent themes she has worked on include accountability debates in India and China; post-Mao policy shifts in China's regional development; Northeast India and its transnational neighbourhood; a critical reading of the transborder subregion; and an agenda for India-China water dialogue.

Mahendra Lama

Mahendra Lama is a professor of South Asian economies in the School of International Studies at Jawaharlal Nehru University, New Delhi, and a former member of the National Security Advisory Board of the government of India. The noted development economist was also the founding vice chancellor of Central University of Sikkim in India and pro vice chancellor of Indira Gandhi National Open University, New Delhi. Among many other appointments, Lama has served as chief economic advisor in the government of Sikkim. He is acknowledged as the architect of the 2006 reopening of the historic Nathu La trade route between Sikkim and the Tibet Autonomous Region in China after 44 years. Besides authoring and editing 22 books, Lama has worked extensively on the issues of energy, trade, investment and energy cooperation, sustainable development and human security in South Asia. He has been associated with international organizations including World Bank, Asian Development Bank, United Nations Development Program, and USAID.

Professor Varaprasad Dolla

Varaprasad Dolla is a Professor at JNU in the Centre for East Asian Studies. His area of specialization include science and technology in China and the modern history of china and domestic politics. In 2004 he was awarded the Fellow Award from Asian Scholarship Foundation funded by Ford Foundation to conduct research on The Tao of Science and State in Post-Mao China for nine months in China. The most recent publications that Dr. Dolla has peer reviewed are "Domestic Politics in Contemporary China: Ideas, Institutions and Issues", in Harsh V. Pant, The Rise of China: Implications for India (New Delhi: Foundation Books, Cambridge University Press, 2012) and "Technology Transfer in Sino-Japanese Relations: The Context, Conflict and Cooperation", China Report, vol. 44, no. 2, 2008.

US Faculty Mentors

Professor Ashok Gurung

Ashok Gurung is the former senior director of the India China Institute and a Professor of Practice in the Julien J. Studley Graduate Program in International Affairs at The New School. As founding director of ICI, he was responsible for establishing and overall development, management, and coordination of ICI programs and projects in India, China, and the United States. A native of Nepal, he has taught several courses on development management, political and social issues in Nepal at the New School and is currently teaching the course, "Global Himalaya: Rethinking Culture and Ecology." Ashok has over twenty years of international development experience as an educator, researcher, manager, grant-maker, policy analyst, activist and training facilitator with civil society groups, academic institutions, foundations and multilateral organizations, and governments worldwide. Among various roles, he was the program officer for the International Fellowships Program, the largest global leadership initiative (\$280 million) of the Ford Foundation. Ashok holds a MA in International Affairs from Columbia University.

Professor Jonathan Bach

Jonathan Bach is chair of the interdisciplinary Global Studies undergraduate program and Associate Professor of International Affairs at The New School in New York. His current work concerns post-socialist transition in Germany and China and how these societies appropriate their past. Bach draws from anthropology, sociology and political science to explore how received notions of sovereignty, space and identity are reformulated through micro-level practices. He has also written on information technology and organizational change, labor migration and citizenship, and political theory. Bach is the author of *Between Sovereignty and Integration: German Foreign Policy and National Identity after 1989* (St. Martin's Press 1999), and his articles have appeared in Cultural Anthropology, Cultural Politics, Public Culture, Theory, Culture and Society, Cultural Politics, Studies in Comparative and International Development, Geopolitics, and Philosophy and Social Science.
